

## Too many politicians, Too small an area, Marginalizing what's important to your neighborhood.

Winfield United spent an enormous amount of money to get their candidates elected as trustees. Spending money is part of politics, but when the candidates all come from a tiny area in a southern corner of Winfield are the best interests of the whole village really being served?

Twenty-five citizens from every corner of town worked hard to place a referendum to district Winfield into 6 districts on the March 20th ballot. We believe the political action committee, Winfield United is buying elections to promote a no-growth vision of Winfield. This zero growth vision has crushed tax revenue, strangled budgets and abandoned our infrastructure. The evidence can be seen in our crumbling roads, our astronomical water rates and our horribly underfunded municipal pension liabilities.

We believe districting creates accountability in politicians. Districting removes the influence of big money and provincial issues from distorting the village's vision. Districting creates continuity and calm that helps to retain good village employees and trustees. A districted village is a village where your political representative lives in your neighborhood and answers to you, not some political action committee on the other side of the tracks.

On March 20th, 2012 please vote YES for the districting referendum and put your neighborhood back in control of your future.

# On March 20th, vote YES for districting.
